Virtual Lab Room Setting Up User Guide

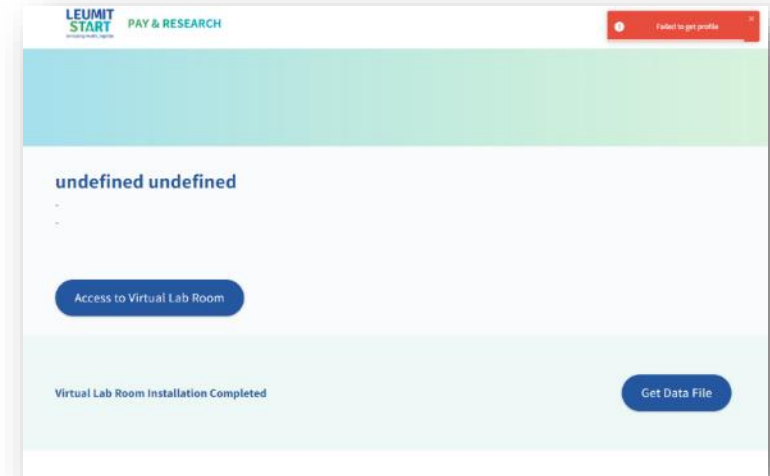

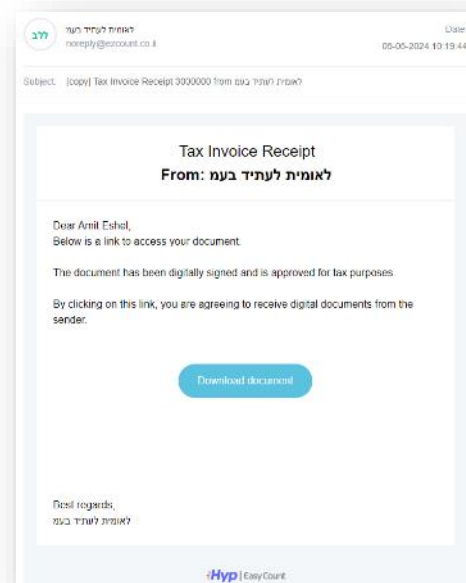

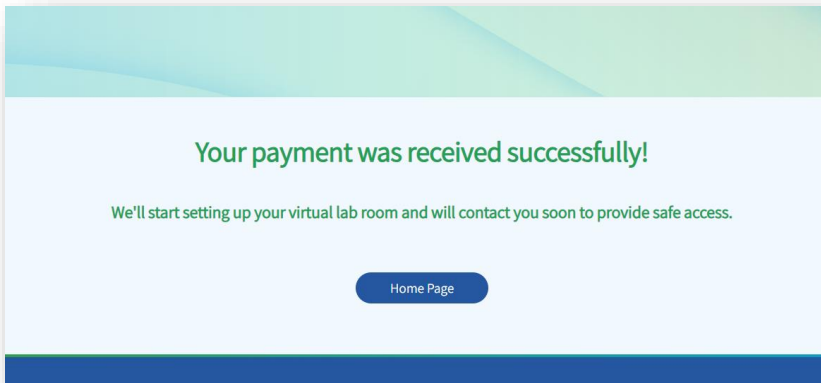

Welcome to Pay & Research!

This guide will walk you through the initial steps to set up your Virtual Lab Room and access the data, after completing the registration and payment steps.

Step 1: Payment Confirmation

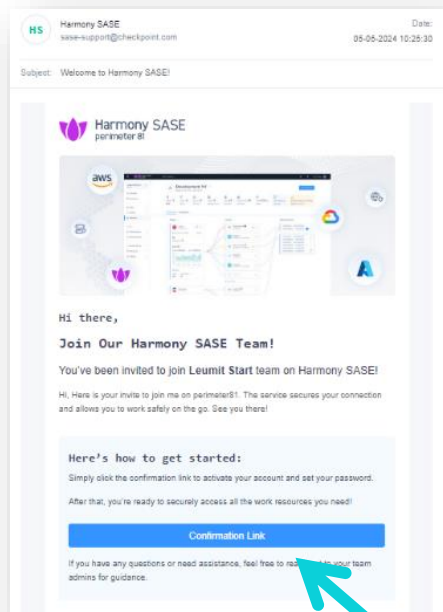

Post-Payment System Update: After making your payment, the system will take up to 10 minutes to update. During this time, your Profile page will might display an error message. Don't worry—this is normal. In case the error message persists, logoff and login again.

Invoice Email: You will receive a payment invoice via email.

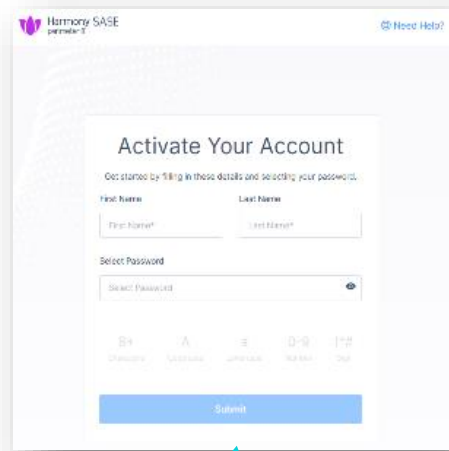

Step 2: Setting Up a User for Secure Access

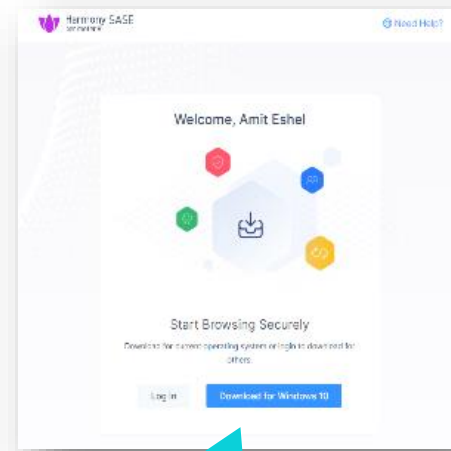

Secure Access Setup Email: Look for an email from Harmony SASE (Checkpoint Company). This email will guide you through setting up a user account for secure access to the Virtual Lab Room. Simply follow the instructions provided. **No additional software download is required**—just activate your account (register) and move to step 3.

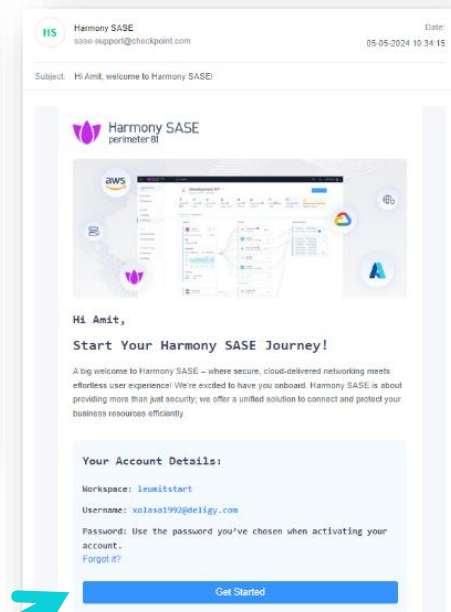

1. Click here

2. Register

3. No need to download

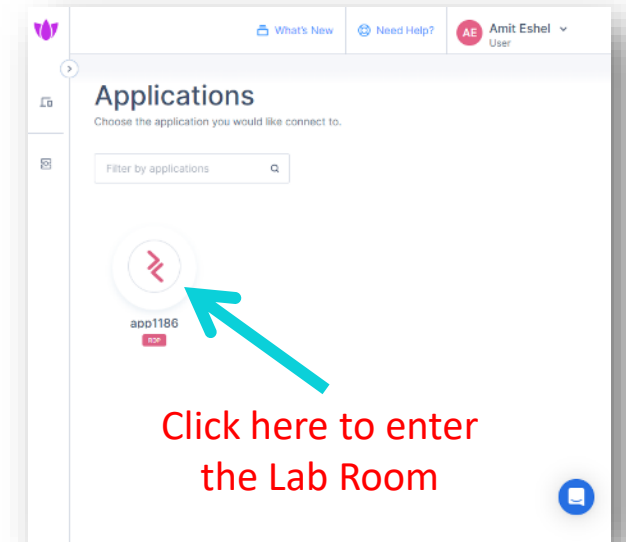

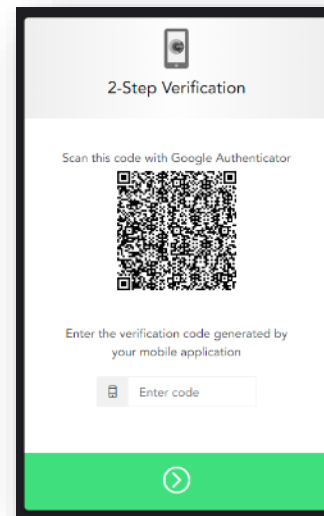

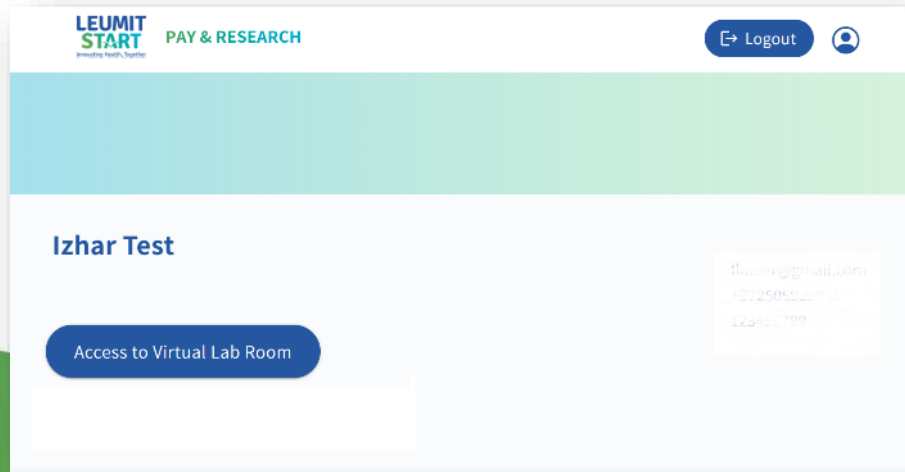

4. No need to click

Step 3: Establishing a Secure Connection

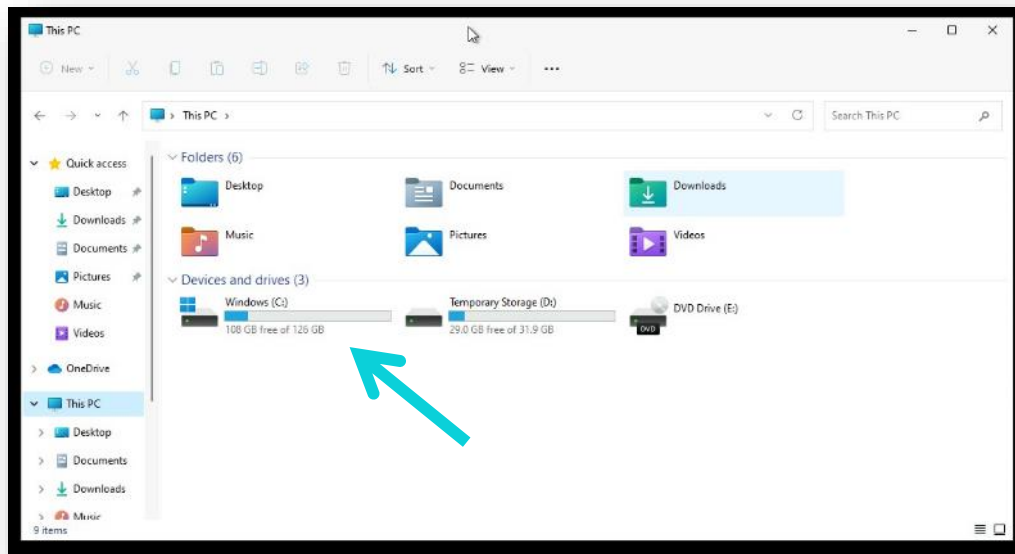

Wait for email update from us: The Pay & Research support team will email you upon completing the setup of your secure connection to the Lab Room (VPN). Then you will be able to access the Lab Room by clicking the button “Access to Virtual Lab Room” in your Profile page and fill-in the verification code. You’ll need to install “Google Authenticator” app in your mobile device (for improved security): 

* When you open the Authenticator click on the + and then scan the QR code.

Step 4: Log in to your Lab Room

Install Research Tools: Once you logged in to the Lab Room, install **all** the research tools you plan to use on drive C.

Important! After proceeding to the next step, you won't be able to access the Internet anymore (nor copy & paste from your local computer).

Please make sure all the tools you need are already installed.

Step 5: Accessing Synthetic Data

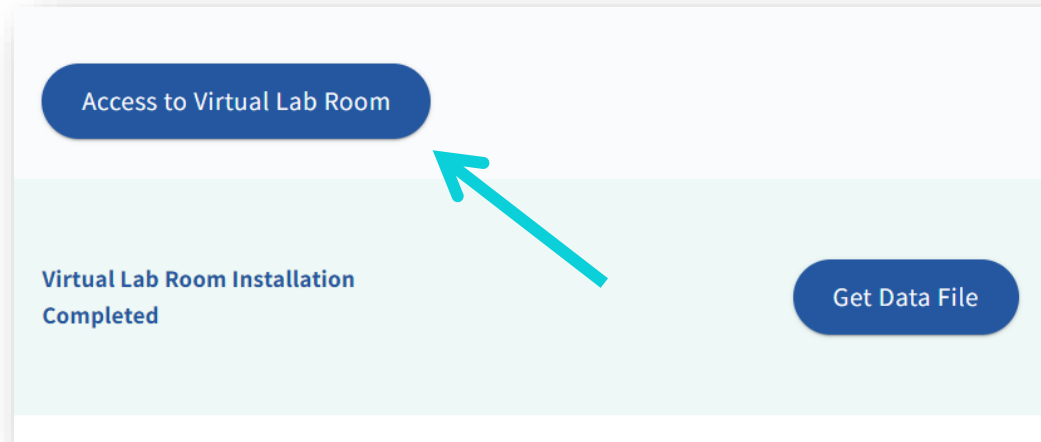

Get Data File: When you've finished installing **all** the research tools, you're ready to get access to the synthetic data. Go to your profile page and click the "Get Data File" button. The Lab Room will disconnect from the Internet, and the data file will be created on drive F within a few minutes.

The image illustrates the process of accessing synthetic data through several steps:

- Profile Page:** A screenshot of a user profile page showing the "Virtual Lab Room Installation Completed" status and a prominent "Get Data File" button. A red arrow points to this button.
- Confirmation Dialog:** A dialog box appears with the text: "Please note, after confirming the completion of the installation, it will not be possible to make changes in the Virtual Lab Room. Are you sure you want to continue?" with "Confirm" and "Cancel" options.
- Success Message:** A message box states: "The data file has been successfully installed on your machine and is located at Disk (F:)" with a close button.
- File Explorer:** A screenshot of a Windows File Explorer window showing the "This PC" view. A red arrow points to the "New Volume (F:)" drive, which has 10.0 GB free of 31.9 GB.

Step 6: Starting Your Research

Begin Working: You can now start working on the data. To access again the Lab Room click the "Access to Virtual Lab Room" button on the Pay & Research website.

Need Help? If you have any questions, feel free to [contact the Pay & Research support team](#).

Happy researching!
